

Invest in Neighborhoods, part of Mayor Lee’s 17-point plan for jobs and economic growth, is an interagency partnership to strengthen and revitalize neighborhood commercial districts throughout San Francisco. The initiative, currently being piloted in 25 commercial districts, aims to strengthen existing businesses, improve physical conditions, improve quality of life, and increase community capacity.

THE DEPARTMENT OF THE ENVIRONMENT AND INVEST IN NEIGHBORHOODS

In collaboration with OEWD, the San Francisco Department of Environment (DOE) offers a “toolkit” with services for small businesses and commercial districts. DOE and OEWD works with community stakeholders, various City Departments and Supervisor’s offices, to identify opportunities to deploy services to meet the goals of each commercial district.

SAVE ENERGY AND REDUCE YOUR COSTS

Contact: (415) 355-3769
SFEnergyWatch.org

Make your business more energy efficient! Take small steps and install energy efficient products and reduce your cost while helping the environment. The Department of the Environment offers on-site energy assessments at no-cost to you, rebates for installation of qualified energy efficient equipment and expert installation of new equipment.

RENEWABLE ENERGY

Contact: (415) 355-3780
SFEnvironment.org/energy/renewable-energy/solar

Renewable energy is energy that comes from resources that are naturally replenished, like sunlight, wind, rain and tides. One great way to cut costs and help the environment is by installing rooftop solar panels. These panels capture energy and help to power your business. For free assistance and information regarding solar installation, financing options and obtaining bids, contact the Department of the Environment.

TRANSPORTATION AND YOU

Contact: (415) 355-3727
CommuteSmart@sfgov.org

Commuting can have an impact on our shared environment. By choosing to walk, bicycle or take transit to work instead of driving alone, you help reduce CO2 emissions and improve the quality of air we breathe. Free assistance for carpool/vanpool partners, starting a commuter benefits program, emergency ride home support and EV charging is available.

TOXICS REDUCTION

Contact: (415) 355-3766
SFEnvironment.org/toxic-health

Keep your business safe and reduce unnecessary exposure to unwanted chemicals. Cleaning products, pesticides, paints, batteries, and other items are hazardous if not properly handled and disposed of. The Department of Environment offers free assistance for choosing less-toxic cleaning products and information for low-cost disposal of hazardous waste.

ZERO WASTE

Contact: (415) 355-3745
SFEnvironment.org/zerowaste

Waste reduction can cut your original bill by up to 75%. Contact the Department of the Environment today for free on-site assistance in waste reduction training. For more information, visit SFEnvironment.org/zwbusiness toolkit.

GREEN BUILDING

Contact: (415) 355-3753
SFEnvironmentnet.org/greenbuilding

What is a green building? A green building is a building created with environmentally friendly, energy efficient materials and appliances. The Department of the Environment provides priority permitting for high-performance green buildings and free assistance on San Francisco's requirements for new construction.
